

PRE-PRODUCTION

Write your experimental protocol in the template provided to you and submit it online. JoVE will script and prepare for filming. Pre-production takes at most 4 weeks.

FILMING

Our experienced videographers film at your lab. Video can be captured from microscopes, computer screens, and even underwater. A filming typically takes half a day.

POST PRODUCTION

After filming, our video team will edit your video, animate schematics, and record voiceovers. The video is then returned to you for review. This process typically takes 4 weeks.

FACTS

The only Video Journal for Biological Research

PubMed indexed

Content ranging from
Basic Protocols to
Advanced Techniques

Over 500 videos published

Publishing 1 video-article
per day

Subscribers include: NIH,
