Qyana Kelly Griffith, MA
Associate Science Editor
Journal of Visualized Experiments – Immunology and Infection
48 Grove Street, Somerville, MA 02144 USA

Dear Qyana:

I am submitting a manuscript (#3639) entitled “Whole mount fluorescent imaging of M cells on Peyer’s patches and small intestinal villi of mice” to be considered for publication in the Journal of Visualized Experiments.

This is a submission that was initially prompted by an email you sent to me on May 23 that was followed by a phone conversation on May 24. We have formatted our contribution following the guidelines of the template you provided.

Thank you for considering this manuscript for publication with production of a video by your staff. I have elected the limited access option rather than the open access option. My understanding is that as an NIH-funded investigator, this submission if accepted will become open access in 12 months.

Sincerely,

Ifor Williams, M.D., Ph.D.
