

A. Tissue collection

B. Extraction of CW glycans

C. Print Microarray

D. Probe with mAbs

E. Quantification

A. Tissue collection

B. Extraction of CW glycans

CDTA extracted glycans NaOH extracted glycans

C. Print microarray

D. Probe with mAbs

E. Quantification

mAb JIM5 - homogalacturonan
(Partially (low) me)

mAb JIM7 - homogalacturonan
(Partially me)

mAb LM8- xylogalacturonan

mAb LM13 - (1-5)- α -L-arabinan
(DP 5-11)

mAb LM6 - (1-5)- α -L-arabinan
(DP ~2)

mAb LM5 - (1-4)- β -D-galactan

mAb LM10 - (1-4)- β -D-xylan

mAb LM15 - xyloglucan

mAb B-400-2- (1-3)- β -D-glucan

mAb B-400-4- (1-4)- β -D- mannan/
galacto(1-4)- β -D- mannan

mAb JIM8 - AGP

mAb JIM13 - AGP
