

São Paulo, April 3, 2012

Dear Dr. Sage:

Enclosed is a manuscript, entitled "Colocalization microscopy to study protein complex assembly in live cells". Please, accept it as a candidate for publication in the Journal of Visualized Experiments. Our work describes a simple but powerful rational for applying live cell microscopy to understand the assembly and dynamics of macromolecular machines. Given the increasing popularity of cell biological approaches to analyze molecular function, we believe our protocol will be of interest to a wide readership. This manuscript is our original unpublished work and has not been submitted to any other journal for reviews.

Sincerely,

Frederico J. Gueiros Filho
