To Prof. Hannon Jane
Associated Editor
JoVE

Object: Cover Letter,

Dear Prof. Hannon Jane,

we carefully revised our manuscript entitled **"TIRFM and pH-sensitive GFP-based probes to evaluate neurotransmitter vesicle dynamics in the SH-SY5Y neuroblastoma cell line: cell imaging and data analysis"**, by Daniele Federica, Di Cairano Eliana S., Moretti Stefania, Piccoli Giovanni, and Perego Carla.

The point-to-point response to criticisms raised in the e-mail letter of August 8th follows.

We trust that in the revised version the manuscript would be appropriate for JoVE.

Best regards,

Carla Perego
