Hi Kelvin,

As discussed, I would like to reproduce the following figures from Beckman Technical Document LXL/A-TB-003HA "An-50 Ti and An-60 Ti Analytical Rotor, Cells, and Counterbalance" for use in a scientific publication. Could you help me obtain explicit re-print permission, for example from the editor/in-charge for this Technical Document, to reproduce the figures?

The figures will be reproduced with modifications as per below:

- Additional labels indicating part numbers
- Additional labels indicating two different type of windows
- Additional lines as guide

The figures will be used to illustrate how to put together a window assembly and a six-channel equilibrium cell without external-fill, and appropriate citation to the technical document will also be included.

Figure 2.1 Assembling Window Components
<image003.jpg>

Figure 2.9 Assembling the Six-Channel Equilibrium Centerpiece Without External-Fill*

<image005.jpg>

Thanks and regards,
Surya

Dear Surya,

Replied from US ,
"The IFU is public domain, so they can cite it if they want. If they would like specific permission I can provide that for them."

Thanks and Best Regards,
Kelvin Wong
