Revised Article Submission JoVE55095R1

Dear Dr. Upponi,

Please find attached our revised manuscript JoVE55095R1 entitled: "Analyzing beneficial effects of nutritional supplements on intestinal epithelial barrier functions during experimental colitis" by Vargas Robles and co-workers. We have addressed all comments of the reviewers and editors as highlighted in the accompanying letter "Answers to Reviewers" using the track changes function of Word.

We hope that you'll find this manuscript now suitable for publication in JOVE.

Kind regards

Dr. Michael Schnoor
