

Suprachoroideal Autologus Cells Graft for retinal regeneration: components

- Adipocytes contained in the fat pedicle placed in the suprachoroidal space, produce bFGF, EGF, IGF, IL, TGF- β , PEDF, adiponectin.
- The ADSCs produce bFGF, VEGF, M-CSF, GM-CSF, PlGF, TGF- β , HGF, IGF-1, IL, angiogenin.
- Platelets produce PDGF, IGF-1, TGF- β , VEGF, bFGF, EGF, PDAF, TSP (thrombospondin)
