Alisha DSouza, Ph.D.
Review Editor
JoVE

Dear Dr. DSouza:

Please find enclosed the revised manuscript entitled “Full-field optical coherence microscopy for histology-like analysis of stromal features in corneal grafts,” authored by myself, Kate Grieve, Marie Borderie, Djida Ghoubay, Cristina Georgeon, and Vincent Borderie.

Two versions are attached, one with all changes tracked and another one with all changes accepted.

Each of the editorial and peer reviewer comments and recommendations has been fully considered in the revised manuscript. Please see detailed responses (in red) to editorial and reviewer comments in the attached file “Responses to editorial and reviewer comments.”

We respectfully re-submit this manuscript for consideration of publication in your journal.

Thank you for your time and consideration.

Sincerely,

Kristina Irsch, Ph.D.
