Dear Dr. Piloni,

Thank you for your interest in the journal Pelviperineology.

Concerning your article entitled "Quantification of abnormal levator ani hiatus enlargement in males and females by Magnetic Resonance Imaging", you are allowed to reproduce the Figures 4 and 5 from the paper "Quantification of levator ani (LA) hiatus enlargement and pelvic organs impingement on Valsalva maneuver in parous and nulliparous women with obstructed defecation syndrome (ODS): a biomechanical perspective" by Piloni V et al, published in the Journal Pelviperineology 2015; 35: 25-31, including the full reference to the paper.

Thank you for your collaboration

prof. Giuseppe Dodi

Managing Editor Pelviperineology
