

Barcelona, 17th September 2018

Dear Dr. DSouza,

Please find enclosed the revised manuscript by Pastor-Ibáñez et al., with reference JoVE58891 entitled "High-throughput NBD-cholesterol Efflux Assay", which we would like to publish in Journal of Visualized Experiments (JoVE).

We thank the reviewers for their valuable time and useful contribution and the editor for her advice to improve the manuscript. We highly appreciate all the inputs, which will definitely help improve the manuscript.

Overall, we have improved the protocol by adding examples and clarifying some confusions and mistakes noticed by the reviewers. We have also taken the opportunity to improve the discussion according to the editor guidelines. We have added two modifications regarding the order of the authors and the disclosure. Finally, we have attached a document containing point-by-point responses to the reviewers' comments and the concerns from the editor.

All authors concur with the submission of the revision of this work.

Thank you very much for considering our improved manuscript,

Sincerely yours,

Olivia
