November 14, 2018

Dear Editor,

We are resubmitting the manuscript titled “Visualizing uniaxial-strain-manipulation of antiferromagnetic domains in Fe_{1+y}Te using spin-polarized scanning tunneling microscope” to be considered as a letter in **JoVE**. We have updated the paper following the editorial comments. We have also added new paragraphs describing the comments raised by the referees.

Together with this cover letter we are submitting the new manuscript, updated figures and one-to-one response to all referee comments.

We thank you for your time and consideration.

Sincerely,

Pegor Aynajian
