Re: Resubmission of manuscript for consideration for publication in JoVE

Dear Dr. Dsouza,

We are hereby returning the revision of our manuscript entitled “Interrogating individual autoreactive germinal centers by photoactivation in a mixed chimeric model of autoimmunity” for your consideration for publication in JoVE.

We were happy to see the positive reception of our manuscript by the Reviewers, with only minor suggestions for improvement. Thank you also for the detailed list of editorial comments and corrections. We have corrected and amended the manuscript according to the suggestions, as detailed in the included point-by-point response and additionally indicated by the ‘tracked-changes’ in the revised manuscript. Furthermore, we have corrected and updated the materials table and uploaded vector files for all the figures.

Thank you for handling our manuscript.

Yours sincerely,

Søren Egedal Degn, PhD
