Dear Dr. Bajaj,

Thank you very much for giving us the opportunity to resubmit our manuscript entitled "Single-Step Enrichment of a TAP-Tagged Histone Deacetylase of the Filamentous Fungus *Aspergillus nidulans* for Enzymatic Activity Assay" (Ingo Bauer, Angelo Pidroni, Özgür Bayram, Gerald Brosch, and Stefan Graessle).

We would like to thank for the editorial editing and revision. We have addressed all points and have included data of a negative control experiment. Please find a point-by-point response to the concerns raised during the editorial revision in the file "Response\_to\_comments2".

We hope that the revised version is now suitable for publication in JoVE.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Ingo B.', with a long horizontal flourish extending to the right.

Ingo Bauer, PhD
