Dear Dr. Jakub Černý,

Thank you for your inquiry! Your paper has published online ( doi: 10.1007/s11676-018-0809-0). So we permit you spreading out of the message of the article published by the video-journal and encourage citation our original journal (i.e. Journal of Forestry Research). We have no the copyright permission file. This is the reply given to you after asking our editor-in-chief. It represents the attitude of our whole team and has corresponding legal effect.

All the best!

Yours faithfully,

Tao Xu

Editor

**Subject:** Request  
Dear Dr. Tao,

based on the manuscript Černý J., Haninec P., Pokorný R. (2018) Leaf area index estimated by direct, semi-direct, and indirect methods in European beech and sycamore maple stands. doi: 10.1007/s11676-018-0809-0 published in Journal of Forestry Research, I received an email from the scientific editor of Journal of Visualised Experiments (JoVE; <https://www.jove.com/publish/> ; please see below) - a video-journal; with the invitation to publish the methodological article (i.e. create video shot) about methods for leaf area estimation used in the article of your journal. This article will deal with a description of these methods technically in detail as much as possible. Given that the JoVE journal is aimed clearly technically, it does not require an original dataset (only representative results are sufficient) and there are stated previously published results with related citation according to meet publishing ethics. Moreover, to obtain previous copyright permission from the original journal (i.e. Journal of Forestry Research) is required. Please, are you open for such spreading out of the message of the article published in your journal by the video-journal and so to encourage citation potential of your journal (through our paper)? If yes, can you provide me the copyright permission from JFR's side for publishing in the JoVE?

On behalf author's members, thank you very much for your reply and help in advance.

Yours sincerely

Jakub Černý

The invitation letter (below):  
Dear Dr. Černý,

I recently came across your paper, "Leaf area index estimated by direct, semi-direct, and indirect methods in European beech and sycamore maple stands". As a Science Editor with [JoVE](#) I am interested in speaking with you about the possibility of publishing your methods as a peer-reviewed video article.

*JoVE* is the leading peer-reviewed video methods journal. Authors submit a traditional text manuscript, and we take care of the entire process of filming and producing your video. The *JoVE* video article below by the Rohwer lab at San Diego State University is an example of the high quality video articles we produce.

Is there a time Tuesday or Wednesday that we could have a brief conversation?

Sincerely,

Lyndsay Troyer Ph.D.
