

Author Bios

Wilber Escorcía, Ph.D.

Postdoctoral research associate in the Leonard Davis School of Gerontology at the University of Southern California. He studies the connection between DNA damage and dysregulated lipid metabolism.

Postdoc: Sean P. Curran Lab at the University of Southern California

Ph.D.: Susan L. Forsburg Lab at the University of Southern California

Kuo-Fang Shen, Ph.D.

Postdoctoral research associate in the Molecular and Computational Biology Program at the University of Southern California. He studies the link between replication stability and chromosome segregation in mitosis.

Postdoc: Susan L. Forsburg Lab at the University of Southern California

Ph.D.: Stephen Osmani Lab at the Ohio State University

Ji-Ping Yuan, M.S.

Manager of the Susan L. Forsburg Laboratory. He uses deconvolution microscopy to answer different questions related to replication stability and chromosome segregation.

M.S.: California State University, Los Angeles.

Susan L. Forsburg, Ph.D.

Professor in the program of Molecular and Computational Biology at the University of Southern California. Her fission yeast lab studies the effects of replication and epigenetic dysregulation on genome instability during mitosis and meiosis.

Postdoc: Paul Nurse Lab at Oxford University

PhD: Leonard Guarente Lab at the Massachusetts Institute of Technology
