Stephanie R. Weldon, Ph.D.
Science Editor, JoVE

Dear Dr. Weldon,

Please find enclosed for your consideration our manuscript entitled "*Isolation of Specific Neuron Populations from Roundworm *Caenorhabditis elegans**". We are submitting this paper in response to your email inquiry about contributing an article to the Journal of Visualized Experiments.

We believe this manuscript summarizes key methodological points of our recently developed and optimized approach to selectively isolate specific groups of neuronal cells from the roundworm *Caenorhabditis elegans* model. We hope that our manuscript will be found suitable for publication in JoVE. Thank you very much for your consideration.

Sincerely,

Oleh Khalimonchuk, Ph.D.
