Dear Dr. Bajaj,

Thank you for your prompt review and invitation to revise our manuscript entitled: *"Using Brainbow and time-lapse confocal imaging to visualize the developing brain in living zebrafish"*.

We are grateful to the reviewers for their time in reading and evaluating our work. I have included a detailed response letter on the following pages. We have also addressed all of the editorial comments. Our revised version of the manuscript includes track changes that display all edits that have been made since the initial submission.

Thank you again for your review of our manuscript. I truly appreciate the time and attention you have given to our work.

Sincerely,

Tammy A. Weissman, Ph.D.
Associate Professor in Biology
Co-Chair, Neuroscience Program
