Dr. Adria Gottesman-Davis
Assistant Director of Production
JoVE (Journal of Visualized Experiments)
17 Sellers St.
Cambridge, MA 02139

Dear Dr. Gottesman-Davis,

Thank you for the opportunity to submit a single complimentary revision of our manuscript titled "Macro-rheology characterization of gill raker mucus in the Silver Carp, *Hypophthalmichthys molitrix*". It has helped us participating authors, improve the quality of our manuscript greatly. We took this opportunity to thoroughly go through the manuscript and put together our comments.

Following the guidelines provided to us, revised manuscript ion accounted for major structural changes. The following files have been uploaded to the JoVE file uploader website:

1. 61379_R3_KVBEditions_AuthorComments_06292020.docx
2. Figure_6.tif
3. Figure_7.tif
4. Figure_8.tif
5. Supplementary_Figure11.tiff
6. Supplementary_Figure16.tiff
7. Table_1.xlsx

The summary of edits on the files listed above are (i) changes due to grammatical errors and sentence corrections in the protocol and portions of the manuscript text, (ii) edits on figure captions in the manuscript, (iii) new annotations placed in figures and supplementary figures, and (iv) deletion of two redundant rows in one table.

The manuscript was revised using "Track changes" and comments were also placed within it to ensure the changes are easily interpreted and transparent. The files listed above were attached via email sent to you as well.

I sincerely hope that the changes made are clear and will be implemented.

I am also sharing my excitement about publishing this paper online in JoVE.

Please feel free to contact me if there are any questions or concerns.

Sincerely,

Kartik V. Bulusu, D.Sc.
