Dear Dr Bajal,

We are hereby submitting the additional editorial revisions for the manuscript entitled “Live imaging of chemokine receptors in zebrafish neutrophils during wound responses”. We have answered your specific comments in the manuscript as tracked changes. We have reduced the highlighted section by removing section 1 and reducing the highlighted text in section 6. We have also uploaded separate supplementary files for related scripts and the reply from Springer Nature regarding the request to reuse material.

We are grateful for your consideration and look forward to hearing from you.

Yours sincerely,

Milka Sarris
