**Benjamin Werth**  
**Sr. Science Editor – Chemistry | Biochemistry**  
**JoVE**

Dear Dr. Werth

Attached you will find the first revision of the manuscript entitled “Size determination and phenotypic analysis of urine extracellular vesicles using Flow Cytometry” as a peer-reviewed video methods for JoVE. This manuscript has not been submitted for publication elsewhere.

In this protocol, we describe a method for the isolation of urine extracellular vesicles (uEVs) from human healthy-donors and their phenotypic characterization by size and surface marker expression using BD Accuri C6 flow cytometer.

All the authors named in the submitted version of the protocol have read and agree with the content of the manuscript. We hope you find our manuscript interesting enough to be considered by JoVE.

We hope to hear from you soon.

Sincerely:
