Criteria
No change
Mild inflammatory cell infiltration. No tissue damage
Infiltration; retinal folds and focal retinal detachments; few small granulomas in choroid and retina, perivasculitis
Moderate infiltration; retinal folds, detachments and focal photoreceptor cell damage; small to medium sized granulomas, perivasculitis and vasculitis
Medium to heavy infiltration; extensive retinal folding with detachments, moderate photoreceptor cell damage; medium sized granulomatous lesions; subretinal neovascularization
