

Dear Editor,

we thank you for consideration in publishing our research work on your journal. We have addressed all the issues as suggested by you and the referees, in particular we have added all the requested details in the protocol section. We have also added a figure representing the representative results.

We want to highlight you that our paper focus on the multidisciplinary of our strategy, that is the result of the combination of several different methods and competences, even very far from each other, for a common purpose. Each of the method itself does not represent either the focus of the paper and the novelty of the strategy. What we would like to be clear to the reader and to the video watcher is that only the combination of all these methods and competences can result in a success, and the combination is the novelty and the plus of our strategy.

Therefore, we hope that we could find together a correct way of representing in the video the main sense of our strategy.

Best regards,

Valeria Costantino
