

Comments and changes done to the paper “Integration of 5G Experimentation Infrastructures into a Multi-Site NFV Ecosystem.”

We would like to take this opportunity to thank the feedback from the editor and reviewers. We hope that the enhancements and modifications done to the paper are able to satisfy the reviewer’s comments.

We present below the detailed comments provided by each reviewer, followed by our answer, making references to the changes done to the paper. In the online submission system, we have uploaded the updated paper with the main changes highlighted in red color.

Yours sincerely, the authors.

Editorial #E

Comment E.1. Please take this opportunity to thoroughly proofread the manuscript to ensure that there are no spelling or grammar issues.

Answer E.1. Following the editorial suggestion, we have done a detailed proofread of the whole paper. In addition, we have done some minor changes to better elaborate the “Introduction” section and correct some typos.

Comment E.2. Please revise the title for conciseness: “A protocol for the” can be removed

Answer E.2. Taking into account the editorial comment, we have removed “A protocol for the” text string from the title. We agree that this modification contributes to make the title of the manuscript more precise.
