

B

The screenshot shows a "Camera Enumeration Filter" dialog box overlaid on a camera management interface. The dialog has a title bar with a question mark icon and a close button. Inside, it says "Check the camera types you wish to detect, uncheck the others:". Below this are eight checked items: "MotionPro X on USB 2.0.", "MotionPro X on Giga-Ethernet.", "MotionPro Y on USB 2.0.", "MotionPro Y on Giga-Ethernet.", "MotionXtra N/NR/NX/Os/CC on Giga-Ethernet.", "MotionScope M on Camera Link.", "MotionXtra HG on Giga-Ethernet.", and "MotionXtra Legacy on Giga-Ethernet.". There is also one unchecked item: "X-Stream PCIe on PCIe.". At the bottom right of the dialog are "OK" and "Cancel" buttons. In the background, a table lists cameras with columns for Name, Address, Activation Key, Type, License, and Link. Other visible UI elements include a "Refresh List" button, an "Interface:" dropdown set to "Expert", and several checkboxes at the bottom like "Activate Camera List.", "Reset camera(s) configuration.", and "Delete images on camera(s) SSD.".
