**External Email - Use Caution**

Hi Harry,

I'm so sorry, I thought I had responded to your previous email.

According to the permissions page on our website ([Copyright, Permissions, and Access | American Association for Cancer Research \(aacrjournals.org\)](#)), you are free to use any portion of your figures so long as you cite them properly, as you said in your previous email that you would:

## Article Reuse

Authors of articles published under copyright in AACR journals have generous reuse rights of the article and its component parts as described below. Reuse by others is available upon request. Reuse of articles published under an Open Access license is governed by the terms of the specific Creative Commons license used.

### Article Reuse by Authors

Authors of articles published under standard copyright in AACR journals are permitted to use their article or parts of their article in the following ways **without requesting permission from the AACR**. All such uses must include appropriate attribution to the original AACR publication. Authors may do the following as applicable:

1. **Reproduce parts of their article, including figures** and tables, in books, reviews, or subsequent research articles they write;
2. Use parts of their article in presentations, including figures downloaded into PowerPoint, which can be done directly from the journal's website;
3. Post the accepted version of their article (after revisions resulting from peer review, but before editing and formatting) on their institutional website, if this is required by their institution. The version on the institutional repository must contain a link to the final, published version of the article on the AACR journal website so that any subsequent corrections to the published record will continue to be available to the broadest readership. The posted version may be released publicly (made open to anyone) 12 months after its publication in the journal;
4. Submit a copy of the article to a doctoral candidate's university in support of a doctoral thesis or dissertation.

Thank you,  
Eileen Echikson
