## **Materials**

| <b>Name</b>                   | <b>Company</b>          | <b>Catalog Number</b> | <b>Comments</b> |
|-------------------------------|-------------------------|-----------------------|-----------------|
| Yeast strains                 | Clontech                |                       |                 |
| Minimal SD base               | US biological           | D9500                 |                 |
| Amino acids                   | Sigma                   |                       |                 |
| 3-amino-1,2,4-Triazole (3-AT) | Acros organics          | 264571000             |                 |
| Zymolase                      | Seikagaku               | 120491                |                 |
| DMEM                          | Gibco-Life Technologies | 31966                 |                 |
| Fetal bovine serum            | BioWest                 | S1810                 |                 |
| Phosphate buffer Saline (PBS) | Gibco-Life Technologies | 14190                 |                 |
| Penicillin-Streptomycin       | Gibco-Life Technologies | 15140                 |                 |
| Trypsin-EDTA                  | Gibco-Life Technologies | 25300                 |                 |
| Renilla luciferase assay      | Promega                 | E2820                 |                 |
| White culture plate           | Greiner Bio-One         | 655083                |                 |
| 96-wellPCR plates             | 4titude                 | 4t-i0730/C            |                 |
| Incubator (30 °C)             | Memmert                 |                       |                 |
| Incubator (37 °C)             | Heraeus                 |                       |                 |
| Luminometer                   | Berthold                | Centro XS-LB 960      |                 |
