## Materials

| Name           | Company                  | Catalog Number | Comments                                                                     |
|----------------|--------------------------|----------------|------------------------------------------------------------------------------|
| C57BL/6 Mice   | The Jackson Laboratory   | C57BL/6J       | C57BL/6 mice were used for datasets related to Rodent Research-1 experiments |
| BALB/C Mice    | Taconic                  | BALB           | BALB/C mice were used for datasets related to Rodent Research-3 experiments  |
| Vivarium Cages | Charles River Laboratory |                | Standard murine cages purchased from Charles River Laboratory                |
| Rodent Habitat | NASA                     |                | This cage and all components are built internally at NASA                    |
| RNAlater       | ThermoFisher Scientific  | AM7020         | RNAlater is used to store the tissue for further RNA isolation               |
